

AMA Pro Road Racing Competitor Bulletin #2010-12

To: All AMA Pro Road Racing Competitors
Date: May 27, 2010
Effective Date: Immediately
Subject: XR Gearing for Road America

Competitors in the XR1200 Series will have a provision to change gearing for the upcoming event at Road America.

The stock pulley ratio of 28 x 68 can be changed to 30 x 66. Part numbers are as follows:

- 30T front pulley: 40380-04 **Note: the countershaft cover needs to be clearanced on the inside to prevent contact with the pulley.**
- 66T rear pulley: 40114-07 **Note: this pulley needs to be machined to a total height of 1.435 inches. Material is to be removed from the inboard side that mounts against the wheel.**

Vance and Hines Racing will make available to all XR1200 competitors the following components:

- 30T front, Machined 66T rear, modified countershaft cover, at their incurred costs of:
 - 30T-modified for clearance: \$35.11
 - 66T-modified to fit XR: \$91.31
 - Sprocket Cover- modified for clearance: \$35.66

Sprocket Cover can also be modified at the track by Vance and Hines for no additional charge.

These components will be available for purchase at the track.
