

Competitor Bulletin #2009-01

To: All AMA Pro Flat Track Competitors
Date: February 19, 2009
Effective Date: February 19, 2009
Subject: Fuel Testing

Fuel Testing

Fuel testing may be conducted at any time during the competition event, solely at the discretion of AMA Pro Racing. VP Fuel has the following suggestions to reduce the possibilities of inaccurate test results:

1. Rinse the fuel tank on the motorcycle with VP fuel to avoid fuel sample contamination from other brands.
2. Rinse all storage jugs and refueling jugs with VP fuel prior to filling with VP C12. This will reduce the chance of contamination and a false fuel reading during testing.
3. Always keep a fire extinguisher close by and follow all applicable safety guidelines when using gasoline.
